

Galina Dobrynina-Kogan

Dr. Galina Dobrynina-Kogan is a clinical associate professor (retired) at BU Wheelock College of Education & Human Development. She teaches a variety of mathematics courses, and her main interest is in creating innovative programs of teaching mathematics and historical perspective of developing mathematical ideas.

Dr. Dobrynina-Kogan is also interested in how mathematics is taught in different countries. During her sabbatical, she investigated how operations with rational numbers were taught in mathematics curricula in Singapore, Russia, Israel, and the US and presented her findings at the conferences.

Dr. Dobrynina-Kogan is well known for her talks at numerous national and international conferences.

For year, Galina taught mathematics and history to her grandchildren in person and via zoom and she is ready to share her experiences

Session: [How to teach family history to children and grandchildren.](#)
