

# EXTENDED ASCII REFERENCE

To key these codes you need to hold down the ALT key while typing the ASCII code ON THE NUMERIC KEYPAD. Typing the ordinary number keys at the top of your keyboard will not work - you MUST use the numeric keypad. When entering the ASCII codes you must enter a 4-digit code, which normally means you type a leading 0 before the rest of the ASCII code. For example if you want to key an ó then hold down the ALT key and type 0243 on your numeric keypad.
